

**UPSKILL TECHNOLOGIES- ADVANCE EXCEL EXERCISES**  
**WWW.UPSKILLTECHNOLOGIES.COM**

**Exercise #** : 101E  
**Level** : VBA Intermediate  
**Objective** : To assess understanding of Loops using For Condition.  
**Compatibility** : Excel 2007 or >

**Instruction:**

Download the excel file associated with the test. Column A has some meanings copied from dictionary. In each cell the word in English and its meaning in Hungarian language is mentioned. The text which is in bold is the word in 'English' language and the remaining words after that are Hungarian. Using VBA to split each cell in column 'A' into 2 columns - one with the word in bold i.e English word and the other for Hungarian.

**Example:**

“**abandon** abandonare, părăsire; a abandona, a părăsi, a renunța” : should be split as below:

|         |   |
|---------|---|
| abandon | abandonare, părăsire; a abandona, a părăsi, a renunța |
|---------|---|

**Hint:** Use For Conditions, Text Functions in Excel, using characters property of a range..

Save the final workbook with your name and the exercise # and send it for evaluation to [info@upskilltechnologies.com](mailto:info@upskilltechnologies.com)
