Exercise #   : 101H
Level   : Advance Excel
Objective   : To understand various features of Pivot Tables.
Compatibility : Excel 2007 or >

Instruction:

Down load the Excel file associated with the test. Sheet "Upskill Sales" consist of auto-part sales for 2015. Please create Pivot Tables to answer each question from the below:

      1) Create a pivot to show city wise sales.
      2) Create a pivot to show city and item wise sales.
      3) Create a pivot to show month and city wise sales.
      4) Create a pivot to show month and city wise quantity.
      5) Create a pivot by putting month and item in rows and city in report filter. Add quantity and sales in values.
          a. Change the pivot table created in above step to classic pivot-table layout.
          b. Remove subtotal for month field.
          c. Split the pivot table into cities using "show report filter pages".

Save the final workbook with your name and the exercise # and send it for evaluation to info@upskilltechnologies.com
